

“Solomon Colors Now Offering Top Choice in Granular”

Springfield IL – Solomon Colors, Inc. based in Springfield, IL with manufacturing plants in Springfield, IL, Rialto, CA, Rancho Cucamonga, CA and Grand Prairie, TX, announce the introduction of their newest addition to the ColorFlo® pigment family – ColorFlo® Granular Pigment. Made in the U.S.A., Solomon's ColorFlo Granular Pigment is a spray-dried, free-flowing pigment targeted for use by CMU block and paver producers.

Solomon Colors manufactures and distributes the pigment, using currently available technology to dispense the granules as part of a complete optimized system to provide concrete producers a supplier who can be responsive to producers needs at all phases of planning, installation and after the sale. To support the new product program, Solomon has added industry specialists to its roster of qualified representatives.

“We have been known for our exceptional ColorFlo® pigments for decades, with their superior consistency and results in the field. Adding Granular to our family of quality pigments simply offers more opportunities for CMU Producers to receive the Solomon Colors consistency, customer service, and quick response delivery they’ve experienced with our other pigments, now in Granular,” explained Richard Solomon, President and CEO of Solomon Colors, Inc.

Solomon Colors, Inc. is a Springfield, Illinois-based company focusing on the construction industry since 1927, with plants and distribution centers nationwide. With color dispensing systems across the globe they are considered a world leader in concrete coloring solutions. For more information, visit www.solomoncolors.com.
