Project Profile

Project: Under Armour Retail Store #2

Profile: Lythic Polished Concrete Products

Materials: Lythic Densifier
Lythic Protector
Lythic Cleaner

Location: China

Overview: Under Armour is rapidly expanding with retail outlets across the world. The bold and dynamic store designs are aimed to keep visitors entrenched in the shopping experience. At the same time functionality was one of the main design features of the flooring requirements. Long-term durability and easy to maintain was the reason for selecting polished concrete.

Lythic polished concrete products offer a complete flooring solution with unique colloidal silica technology. The 100% reactive silica ensures the concrete is chemically hardened prior to the mechanical polishing process that takes place.

More store to be polished with Lythic technology.
