Project Profile

Project: Noodle Bar Fast Food Outlet #1
Profile: Lythic Polished Concrete Products
Materials: Lythic Densifier
Lythic Protector
Lythic Cleaner

Location: China

Overview: The design team for the Noodle Bar required function, durability, low maintenance in addition to creating a floor that did not look too industrial. They wanted people to feel comfortable during the eating experience.

The floor was highly polished using Lythic Densifier. Afterwards a template was placed over the entire floor allowing the design to be sand-blasted with a light etch. When the template was removed the floor was cleaned and sealed with Lythic Protector. General cleaning is completed daily with Lythic Protector and a high speed burnish.
