UltraFiber 302 Blend

If you think that Fiber Blends won't stand up to the competition then take a look at how each product fairs in a comparison.

Ultra-Fiber 302 meets and/or exceeds the others in every category.

| ここに きかうでく ひっし とうして | Mar Internet | | |
|--|-------------------------------|------------------------------|---|
| Features | UltraFiber 302 | Macro-Fibers | Welded Wire |
| Reinforcing always positioned properly | Yes - mixed | Yes - mixed throughout | No - Requires support and |
| | throughout concrete | concrete matrix | labor intensive |
| | matrix | | |
| Reduction in Plastic Shrinkage and temp. | Yes | Yes | No |
| Cracks/Early Age Benefits | | | |
| Crack Control in Hardened Concrete | Yes- very high | No - low modulus of | Yes - if properly positioned in |
| | tensile strength and | elasticity | the upper third of the slab |
| | high modulus of elasticity | | |
| Easy to place in the concrete mix | Yes - mixed into | Yes - mixed into concrete | No - must be supported on |
| | concrete | | chairs or slab bolsters in upper third of the slab |
| Provides three dimensional reinforcement | Yes | Yes | No - reinforcement is only on |
| | | | one plane in the concrete |
| Superior finish with no effect on | Yes | No - Common issue, | No - slows the placing and |
| workability of the mix | | fibers on surface and | finishing of the concrete |
| | | must use ad mixtures to | |
| | | maintain workability | |
| Cost effective, safe to use and no labor | Yes | Yes - but requires the | No - very labor intensive and a |
| | | additional cost of \$8- \$10 | safety hazard |
| | | in admixtures per cubic | |
| Duilding and approved | Vee | yard to place and finish | Vee eek 4v4 4/4 welded wire |
| Building code approved | Yes | Yes | Yes - only 4x4 4/4 welded wire |
| Meets ACI 302-15 design guide lines for | Yes | Yes | mats on supports Yes - only 4x4 4/4 welded wire |
| slab on ground | 165 | 165 | mats on supports |
| Renewable materials & environmentally | Yes | No | No |
| friendly | 100 | | |
| Meets or exceeds ASTM specifications | Yes | Yes | Yes – only if certified |
| Impact and shatter resistance | Yes | Starting at 6 lb dosage | None |
| | | some improvement | |
| Corrosion resistant | Yes | Yes | No - corrodes when exposed |
| | | | to water and chemicals; |
| | | | aesthetics and possible |
| | | | disruption |
| Accepted Design Protocol - additional | Steel Component | No | Very limited and based on |
| tensile capacity | | | WWF size |
| Extend Joint Spacing | No | No | No |
| Higher Residual Strength Characteristics | Yes | Yes | No |
