

Colorful Theme Park

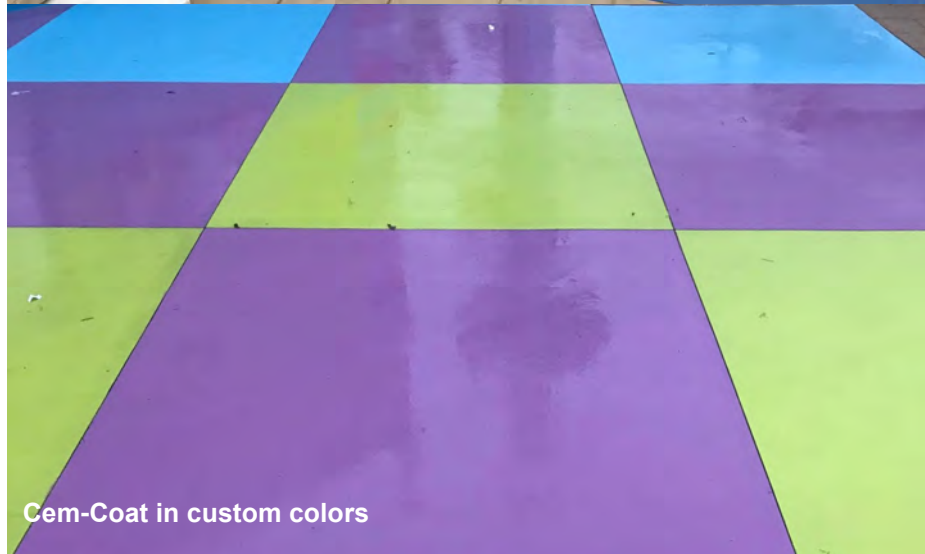

Colorful Theme Park

Structure Type: Theme Park
Project Type: Commercial
Location: Carlsbad, CA
Products: Cem-Coat
Integral Color

Overview: Theme parks are a natural application for decorative concrete. The many unique and fantastical finishes must also be able to withstand high traffic and manageable maintenance. This theme park has a design motif that requires many non-standard, bold colors.

Cem-Coat was the natural choice to achieve these unique colors without sacrificing durability. Cem-Coat allowed for bold, diverse range of colors not possible with integral pigments. Unlike integral color or dry shake hardeners, Cem-Coat can be stenciled or masked for crisp and precise patterns. The architect provided a layout with the desired colors based on Pantone values. The Solomon Colors lab accurately matched these colors with specialized pigments and custom Cem-Coat blends.

Cem-Coat is a good choice for non-traditional concrete colors and patterns.
