

ColorSelect® GT1

Custom built ColorFlo®
Granular pigment dispenser
for use in concrete products
manufacturing.

SYSTEM

- Custom built ColorFlo® Granular pigment dispenser for use in concrete products manufacturing facilities
- Up to 8 super sack stations
- Capable of serving multiple mixers
- Services up to six cyclones
- Dense phase pneumatic conveying
- Use with cyclones or direct inject into concrete mixers
- Control unit consisting of a state-of-the-art Siemens 277E PLC control system with HMI and remote access capabilities
- Remote access for technical support and updates
- Ethernet based pneumatic control panel and cyclone service panel features advanced diagnostics and easier scalability when adding multiple cyclones
- Electronic assisted control valves for accurate dispensing
- 80 lb. capacity scale with stainless steel hopper
- The load cell will have operating tolerances of ± 10 grams up to 20 kg. and a maximum load capacity of 35 kg.
- Advanced record keeping and reporting
- Capable of seamless integration to popular concrete batching plants
