

ColorFlo Liquid Bucket Table

Thousands of colors can be created in ColorFlo® Liquid pigment from only a few primary colors, all while drastically reducing color inventory.

SYSTEM

- Designed for Ready-Mix, Distributors, and Volumetrics suppliers
- User-friendly PC touch screen interface
- Utilizes Solomon Colors' signature V-Bottom stackable totes
- Batches pigment into 1-gal, 2-gal, 3.5-gal, & 5-gal buckets
- System prints a 4" x 6" label after each bucket
- Base: 20' x 46", Height: 80", Stacked height: 13' 2"
- Variable frequency drive controlled pumps for high accuracy
- Requires 110V and clean, dry air
- Built-in remote access for 24/7 technical support and software updates
