REQUIREMENTS

- Electricity: 110 V, 15 Amp
- Air: 5 ft² at 80 PSI
- Water: None

QUICKCOLOR SG GRANULAR SYSTEMS make ready mix color possible in a distributor model. Thousands of colors can be created in SG Granular pigment from only a few primary colors, all while drastically reducing color inventory.

The QuickColor SG Granular System is the convenient, clean way to dispense and package color. The system has a compact footprint and easily fits at the end of a standard warehouse shelving unit. A trolley makes it easy to retrieve bags or buckets after pigment is dispensed. Sell pre-packaged color without carrying a large stock of bagged dry color.

THE QUICKCOLOR GRANULAR SYSTEM:

- **Color on demand:** Thousands of colors at the touch of a button
- **Cleanest color:** Easy-to-clean spills and minimal dusting
- **Small footprint:** Fits the same space as 4 standard pallets
- **Easy installation:** Requires 110V and air – no water!
- **Simple, efficient design:** User-friendly interface and few moving parts
- **Inventory control:** Stock only 4 primary colors
- **Superior pigment:** No settling, no freezing, minimal mess and dust, 100% solids
- **Save on freight:** 100% solids – don't pay to ship water; no totes to return
- **Increased flexibility:** Bag color in store; bag color in central plant for use in satellite facilities
- **Limited height applications:** 114" tall version using 1000 lb. Calf Sacks available.

ColorFlo® SG Granular Color

Solomon Colors ColorFlo SG Granular Pigment is an excellent free flowing, low dusting color for Ready Mix and Manufactured Concrete Products applications. With ColorFlo SG Granular, Solomon Colors cements its position as the industry innovator.

INNOVATIVE PIGMENT

Granulated in Springfield, Illinois using an advanced process, ColorFlo SG Granular pigment is unlike any other on the market. This innovative method creates a pigment with easy flowability, tighter particle size tolerances, reduced dust formation, and color development that meets or exceeds that of any competing granular pigment in both wet and dry slump conditions.

GRANULAR DISPENSING

ColorSelect and QuickColor granular systems accurately and efficiently dispense SG Granular pigment. Solomon Colors has granular dispensers for any Ready Mix, Precast, and Paver and Block application. Create thousands of colors from just 4 primary colors.

SOLOMON ADVANTAGE

Solomon Colors granulates every ounce of ColorFlo SG Granular pigment in-house in Springfield, Illinois. Every order is backed up by Solomon Colors' decades of innovation, stringent quality control, and exceptional customer service. Turn to Solomon Colors for your granular pigment needs.
